Visual Art Classes

Class: Discovering Photography
#3581-20-LSA
March 29-May 3 (6 Sundays) 5:30pm-8:00pm
Merit Library room 346; 225 N Mills St. Madison WI

Instructor: Jason Houge
Email: jason@jasonhouge.com
Phone: (920) 530-9544
Website: jasonhouge.com

A welcome note from your instructor:
Greetings! In this course we’ll be exploring basic digital photography. Maybe you’ve just purchased a new camera and you’re feeling intimidated by all of the menus and buttons. Maybe you just want to take better images with your phone. In this course, you will take a journey to become more confident in your equipment and learn some new tricks along the way—including some basic editing and archival skills using both a computer and apps available for your phone.

Tips for success:
Please bring 5-10 small prints of the photography you’re currently making or are interested in working on. This will help set the tone and direction for the class. If you are planning to use a digital camera, you will need a USB flash drive and card reader. If you are using a phone, I recommend having a battery backup to prevent your battery from dying while we work. Make sure all batteries have a full charge before class.

Supply List: (Bring your own)
Note: All supplies are suggestions. Mention of a brand or retailer should not be considered UW-Madison endorsements. Students may make substitutions.

Required Materials:
- Any modern Digital Camera or Smart Phone, notebook and a writing utensil

Optional (Suggested) Items:
- USB Flash Drive (USB3.0 is suggested)
- Card reader matched to the flash memory of your camera (if applicable)
- Rechargeable battery backup for mobile devices
